## PRC-9 RT-175A / PRC-9

MILITARY U.S.: PRC-9 RT-175A / PRC-9 [Militare]

Paese: [USA \(Stati Uniti d'America\)](#) Produttore / Marca: [MILITARY U.S. \(different makers for same model\)](#)

Anno: 1951–1962 ?

Tipo: Apparato militare

Valvole

14: [1AD4 5678 6286 5672 5A6](#)

Circuito Ricetrasmettitore; ZF/IF 4300 kHz; 1 Stadi BF

N. di circuiti 9 Circuiti Mod. Freq. (FM)

## accordati

**Gamme d'onda** Gamme d'onda nelle note.

## Particolarità

**Tensioni di funzionamento** Batterie a secco / 1,5 & 6 & 67,5 & 135 Volt

**Altoparlante** - Per cuffie o amplificatori esterni

## Potenza d'uscita

**Materiali** Mobile di metallo

**Forma** Diverse forme (descritte nelle note).

**Dimensioni (LxAxP)** 265 x 77 x 470 mm / 10.4 x 3 x 18.5 inch

The RT-175A FM-transceiver is a main component of the PRC-9 radio-equipment. Only in literature we can find the name PRC-9A, but on the equipment the -A suffix is never present.

Frequency range is 27-39 MHz, FM (F3), 1 W.

VFO-tuning and a crystal calibrator stage giving 4,3 MHz checkpoints. In the receiver-part we find 2 RF-stages, 4 IF stages, a discriminator FM-detector with 2 germanium diodes, a squelch-circuit and a pulse sweep generator to control the transmit frequency.

At the top we find all controls and connectors for the headset and 3 antennas: long whip AT271, short whip AT-272, and a ca. 50 ohm BNC-connector.

## Annotazioni

The set was designed for field use with a 3,65 kg multi-voltage battery BA-279, or for vehicular use with a 24 volts PSU and audio-amplifier AM-598.

All tubes, except the noval 5A6, are of Special Quality subminiature B5A type. The factory aligned complete IF circuits, including the mini-tubes, are housed in sealed metal cans with B7G-pins, as well as the discriminator-circuit and the pulse sweep generator. Similar, but with different frequency-ranges are RT-174A / PRC-8 20-28 MHz, and RT-176A / PRC-10 38-55 MHz. A variant with different circuitry and 16 tubes, but a look-alike, is the RT-175 / PRC-9. Another variant is the 1 channel, 30-42 MHz, crystal controlled RT-339/PRC28.
